**'Alta montaña' by the river- Full day**

The traditional excursion for the whole year is the one that goes from Mendoza to the border with Chile, through excellent paved routes on the side of the road that borders and goes up the Mendoza River.

During the tour, it is possible to appreciate the giant Potrerillos Dam. Further on, in Puente Del Inca at 2,720 meters above the sea level, the Cuevas River has pierced the mountain forming a natural bridge at the edge of which there are thermal waters. A short distance from the border, a magnificent natural viewpoint allows us to appreciate the splendor of Aconcagua, with 6,960 meters of height. An unpaved road that starts from the International Route makes it possible to go some kilometres into the beautiful Horcones Lagoon and the Aconcagua Provincial Park.

Following the International Route, there is the Horcones customs complex and a few kilometers ahead, already on the border with Chile, the town of Las Cuevas built following an European style, at 3,200 meters above sea level.

Between Las Cuevas and the international tunnel that leads to Chile there is a route that, if the weather conditions are favorable, allows visitors to ascend to the Cristo Redentor monument (generally from January to March), located at 4,200 meters above sea level, which symbolizes the brotherhood between Argentines and Chileans.

Finally, you return to the city of Mendoza.
